BRANDED ONLINE LEARNING PORTAL

Employees value the opportunity for professional development and training within the workplace, and BizLibrary's Learning Management System is a cost-effective way to deliver employee development and training. Create your own branded online university or learning portal, with your logo and color scheme.

ONLINE DELIVERY OF WEB-BASED COURSES, TESTS AND SURVEYS

With access available 24 x 7, online training and e-learning saves time by providing training to your employees when it's convenient for them. You can build a program of online training that delivers important courses as needed, including comprehensive tests and surveys that give you insight into what training is effective and what additional training might be needed.

AICC/SCORM COMPLIANT

Ensures all 3rd party content – AICC & SCORM compliant is compatible in our system. Our LMS is more than AICC compliant...it's been certified!

"Small businesses looking for a provider dedicated to their needs should consider BizLibrary."

Bersin & Associates

ONLINE TRACKING OF ALL LEARNING ACTIVITIES

All employee's' learning activities can be managed through the LMS. There is no need to maintain multiple spreadsheets that track classroom training or off-site education events. All employee training activities and progress can be monitored and reported on from our LMS.

EXTENSIVE MANAGEMENT REPORTING

You can view a variety of progress and activity reports, both standard and custom. Anytime you need to see progress or utilization of available training resources. Standard reports provide information about user progress, test results, resources usage and survey results. Other management reports are available on-demand at the individual, group and enterprise level.

INTEGRATED EMAIL MESSAGING

You can create and schedule email messages to be delivered to your employees based on a various criteria and activity. You can notify employees of new course assignments, managers and administrators of course completions, new enrollments and more....all through the LMS.
